SUMMARY

Business Analyst and Scrum Master with an MBA in Business Analytics and experience in banking, NBFC and financial technology projects. Skilled in requirements gathering, BRD/FSD/RSD documentation, workflow analysis, API and integration coordination, UAT, defect tracking and Agile delivery. Experienced in coordinating cross-functional teams across product, development, QA, AI and DevOps, while supporting digital onboarding, KYC/VKYC, lending workflows, vendor evaluation and process improvement. Strong analytical, stakeholder management and communication skills with a practical, solution-oriented approach to delivering business and technology initiatives.

Business Analyst | Scrum Master | Banking & FinTech | Product & Project Coordination

WORK EXPERIENCE

Business Analyst
Distinct Infotech Solutions | Kochi, Kerala
November 2026 – Present

- Working on enterprise financial software and business applications, with exposure to core banking, remittance, foreign exchange, financial accounting, and regulatory workflows.
- Building functional and domain understanding of CASMEX (Enterprise Financial Software), iShield (Anti-Money Laundering), and WPS (Wage Protection System).
- Developing knowledge of financial transaction processing, AML compliance, customer risk profiling, transaction monitoring, payroll processing, and UAE regulatory requirements.

Business Analyst / Scrum Master
Pixdynamics Private limited, kochi, Kerala
August 2025 - November 2026

- Managed Business Analysis activities for banking and NBFC projects, including requirements gathering, workflow analysis and preparation of BRD, FSD and RSD documents, translating business requirements into clear functional and technical specifications.
- Served as Scrum Master for VKYC, AI, DevOps and development teams supporting digital banking and financial services projects, coordinating sprint planning, daily stand-ups, sprint reviews, EOD updates, task tracking, issue resolution and cross-functional collaboration.
- Coordinated product and project delivery activities across digital onboarding and lending workflows, including API integrations, UAT coordination, defect tracking, JIRA ticket creation, pre-release audits and delivery planning, ensuring alignment across business, product, development and QA teams.
- Prepared product and integration requirements for solutions including UAE Pass authentication, digital onboarding, KYC/VKYC and banking workflows, coordinating with clients and internal stakeholders to support successful implementation.
- Conducted global KYC, KYB, identity verification and payment gateway vendor research for financial services use cases, evaluating vendors, coordinating product demonstrations and supporting technology and commercial assessments.
- Managed Zoho Bigin CRM configuration and data management, including form configuration, lead management, data quality, reporting and process improvements supporting sales and business development operations.
- Coordinated and monitored digital marketing activities, including sprint and content planning, task allocation, performance tracking and reporting across the digital marketing team.
- Supported management operations through stakeholder coordination, sales and leads meeting management, vendor communication, reporting and audit preparation.

Assistant Sales Manager
Wexl Education Private Limited, Hyderabad,Telangana
June 2024 - February 2025

- Led B2B sales outreach to schools and academic institutions across Uttar Pradesh, contributing to a 30% increase in client acquisition.
- Promoted AI-powered learning solutions and micro-learning programs, demonstrating product value to education-sector decision-makers.
- Conducted product demonstrations and training sessions for educators and school administrators, supporting adoption of digital assessment solutions.
- Managed the sales pipeline using CRM tools and prepared reports and forecasts to support senior leadership decision-making.

EDUCATION

MBA in Business Analytics
CHRIST (Deemed to be University), Delhi NCR.
June 2022 - May 2024

- Completed MBA with specialization in Business Analytics, gaining expertise in data driven decision making, predictive modeling and analytical tools such as Excel, SQL, Power BI and Python.
- Conducted a research thesis titled "Influence of Social Media in the Usage of Bodybuilding Supplements", applying statistical methods and data analysis to examine consumer behavior and social media influence.
- Utilized tools like Tableau and Power BI to design interactive dashboards and data visualizations; performed exploratory data analysis (EDA) using Python to derive actionable business insights.
- Executed case studies involving clustering, regression analysis and time series forecasting; applied machine learning algorithms for customer segmentation and churn prediction using Python and R.

Bvoc Food Processing Technology
Christ (Autonomous)college Irinjalakuda, Kerala.
July 2019 - May 2022

- Completed a 3-year skill-based program specializing in food processing, preservation, packaging and quality control, with a strong emphasis on practical and industry-relevant training.
- Gained hands-on experience with food processing equipment and technologies, including dairy, bakery and beverage processing.
- Trained in food safety standards and regulatory practices, including HACCP, FSSAI guidelines and ISO food quality systems.

INTERNSHIPS

Business Analyst Intern
Hysan Soft Software solutions, Thrissur, Kerala.
January 2022 - March 2022

- User Feedback Analysis: Collected, reviewed, and analyzed user feedback on HYSAN's healthcare software solutions to evaluate usability, functionality, user satisfaction, and overall product experience.
- UX Research & Reporting: Prepared detailed UX reports by identifying recurring user concerns, usability challenges, feature gaps, and areas requiring improvement.
- Data Interpretation: Categorized user feedback, identified recurring patterns, and interpreted qualitative insights to understand user behaviour and highlight potential product enhancement opportunities.
- Problem Identification: Conducted comparative analysis of user expectations and existing software functionality to identify gaps, assess usability issues, and prioritize improvement areas.
- Stakeholder Collaboration: Collaborated with cross-functional teams to communicate research findings, present analytical insights, and recommend UX improvements aligned with client expectations and business objectives.
- Product Enhancement Support: Contributed to product improvement discussions by translating user feedback into actionable recommendations, supporting informed decisions on usability and feature enhancements.
